HURSTPIERPOINT & SAYERS COMMON
PARISH COUNCIL

To: Members of Traffic and Parking Working Group Committee

BRIEFING NOTE

Re: Car parking Survey - ANALYSIS of DATA

This was carried out on Tuesday 29 September 2015 and Thursday 8 October 2015 just observing the parking over 30 minute slots from 7.00 – 9.30 and then from 15.00 – 18.30 at Trinity Road Car Park (Long Stay and Short Stay) and Brown Twins Car Park. The findings are summarised below:-

Trinity Road Long Stay Car Park

- It appears that between 36 -39 cars are parked overnight by residents and about 13 of these were driven off with people going to work.
- This car park gets full any time after 8.10 in the morning although odd spaces come available thereafter when people leave, with the space being filled fairly quickly.
- Between 8.30 – 9.00 during the school run if the short term car park is full parents park in the side parts of long term car park and also in front of school and village centre to drop off children.
- Late afternoon and early evening more spaces become available as people leave work.
- It would appear that those parking who work in Hurstpierpoint is split nearly equally between the school and the rest.
- The school as the biggest employer in the Village has at present the need for around 50 cars and appears that this need is split 3 ways, their own parking facilities for about 17 cars, a similar amount using the long term car park and the remaining similar figure use parking on the road.
- Along Trinity Road, Brown Twins Road and top end of Marchants Road around 60 cars park on the street between 8.00 – 9.30.

Trinity Road Short Term Car Park

- Generally there are always spaces in the short term car park
- The only time when it becomes full are for short periods during the school run where parents park to take children to school. These are between 8.30 – 9.00 and 15.00 – 16.00.
- If after school clubs take place and late afternoon clubs at the Village Centre then the short term car park can remain nearly full until about 17.30. Unsure if Thursday is the worst day for this or every day is similar – mixed views from parents.

Brown Twins Car Park

- It appears that around 10 cars are parked overnight by residents as the numbers parked at 7.00 were the same as that at 18.30.
- It appears that this car park becomes full between 8.30 – 9.00 once the Trinity Road Long Term car park is full and also nearby street parking.
- People who work at the lower end of the High Street may use this car park.
- It appears quite a few cars depart between 17.30 – 18.00 and at the same time.

As this was only an observation survey and some assumptions made, but it does appear that more long term car parking is required in Hurstpierpoint in the future. The school still has 3 more year classes to start which will mean more staff and parents wanting to park, building of the new estates will increase car parking requirements both short and long term, also would alleviate the need for much street parking around the area.
